

Wastewater Networks

The Level 5 Certificate in the Management of Wastewater Networks

This qualification is designed for Waste Water Network Field Managers, Operational Managers, Project Managers, Department Heads, and other practising Senior and Middle Managers. The qualification will develop your technical skills and understanding of the Management of Waste Water Network and improve your performance. It will encourage strategic thinking at this level of management, to foster business improvement.

Waste Water Network learners will be taught how to take responsibility for planning and developing courses of action, including, where relevant, responsibility for the work of others and how to exercise autonomy and judgement within broad parameters and to address the knowledge and understanding of the Management of Waste Water Network.

The qualification addresses the practical competencies required for the effective management of Waste Water Network operations and provides evidence of organisational competence for Regulators and other stakeholders.

Level 5 Certificate in Management of Waste Water Networks

Overview of the Qualification – Main Themes

- Comply with regulatory requirements for wastewater networks for their area of responsibility within their organisation.
- Manage wastewater networks for their area of responsibility within their organisation.
- Understand how to deal with failures or problems arising within network operations for their area of responsibility within their organisation.
- Take action to ensure that Flood Risk Management is addressed in an effective way within their area of responsibility within their organisation.
- Take action to ensure implementation of best practice within wastewater networks for their area of responsibility within their organisation.
- Understand how to contribute to the production of an adaptation plan designed to address the challenges presented by a changing climate.
- Contribute to the management of asset renewal and maintenance within wastewater networks for their area of responsibility within their organisation.

Assessment

Candidates must demonstrate the level of knowledge and/or skills described in the units. Assessment is the process of measuring a candidate's knowledge and understanding against the standards set in the qualification. Each candidate is required to produce evidence which demonstrates their achievement of all of the learning outcomes and assessment criteria for each unit.

Upon successful completion of their qualification, learners are able to progress to further learning within the suite of Water Level 5 Qualifications – i.e. completing an Award or Certificate and topping up to Foundation Degree and on to Honours Degree.

Learners may also wish to further their ongoing personal and professional development by accessing other qualifications.
